Three Bearings for Arm Shaft and Pressure Lubrication for Gears

feature the High Speed SINGER

95-80 and 95-100

For Maximum Production of Quality Stitching

Superseding the popular Singer 95-40 and 95-60 Machines respectively, the plain bearing 95-80 and ball bearing 95-100 offer the latest improvements which make them the foremost machines of their type for stitching light and medium weight fabrics.

THE 95-80
Has three plain bearings for the arm shaft and will maintain a speed as high as 4200 stitches per minute.

THE 95-100
Has ball bearings at both ends of the arm shaft and a plain intermediate bearing. This machine can be operated up to the speed of 4200 stitches per minute. Its ball bearings enable it to accelerate faster, increase production and save power.

The following features apply to both Machines...

GEAR DRIVEN ROTARY SEWING HOOK—
Positive—accurate—produces perfect lock stitching.

PRESSURE LUBRICATION OF GEARS—
Gear cases are equipped with Alemite-Zerk fittings which provide for convenient and quick application of grease to gears by means of an Alemite-Zerk hand pressure gun. This clean system insures quiet running gears and reduces wear to the minimum.

THIRD BEARING FOR ARM SHAFT—
Rigidly supports arm shaft and promotes quieter operation.

HEAVY SHAFTS DRIVE SEWING HOOK—
Make possible higher sustained speed.

DROP FEED AND HINGED PRESSER FOOT—
Readily handle work of varying thicknesses—uniform length stitches are made at all speeds.

LENGTH OF STITCH—
Stitches varying in length up to 7 to the inch can be made.

DISC BALANCE WHEEL—
Absence of spokes in balance wheel is a safety feature.

WORKING SPACE—
Clearance at right of needle is 7 3/8 inches. Bed is 15 11/16 inches in length overall.

ATTACHMENTS—
Binders, hammers, folders, tuckers, etc., can be furnished for use with this machine. Attachments will be furnished, on order, at an additional charge. Samples of thread and material and, if possible, made-up samples of work should accompany all orders for attachments.

NOTE: The customer should be provided with Grease Gun 121587 (3 oz. capacity) or 121588 (1/2 lb. capacity) with the first machine ordered. As either of these guns will serve for several machines, they are not included as part of the head and must be ordered separately.
