For W. & G. Flatlock and Feldlock Machines only:

Approved Safety Guard No. 30179—For 3' 6" Table Top

Approved Safety Guard No. 30180—For 4' Table Top.

W. & G. APPROVED SAFETY GUARD
for
W. & G. SECTIONAL POWER TABLING

The W. & G. Approved Safety Guard for W. & G. Sectional Power Tabling gives simple and effective protection to sewing machine operators, and increases their efficiency through the added sense of security against injury. Quick access to Table Shaft Belts is had without removal of Safety Guard, and the Transmitter is reached by simply allowing the Transmitter Guard to drop forward toward operator. This Approved Safety Guard is also sanitary because it does not obstruct the cleaning of the floor.

Installation is quite easy, consisting of removal of Skirt Guard Board from the Table, but retaining the Board Bracket into which the Safety Guard readily fits. A variation of 1" at each end of the Guard allows of adjustment sidewise. The Transmitter Guard fits snugly against under side of Table and is supported by a Bracket on the Safety Guard.

W. & G. Approved Safety Guards, Complete, for W. & G. Sectional Power Tabling are made as follows:

For all W. & G. Machines except Handstitch, Visible Stitch, Flatlock and Feldlock Machines:

Approved Safety Guard No. 30175—For 3' 6" Table Top
Approved Safety Guard No. 30176—For 4' Table Top.

For W. & G. Handstitch and Visible Stitch Machines only:

Approved Safety Guard No. 30177—For 3' 6" Table Top
Approved Safety Guard No. 30178—For 4' Table Top.

For W. & G. Flatlock and Feldlock Machines only:

Approved Safety Guard No. 30179—For 3' 6" Table Top
Approved Safety Guard No. 30180—For 4' Table Top.

The Willcox & Gibbs SAFETY GUARD for Sectional Power Tabling has been APPROVED by the Department of Labor, State of New York.
