Machine No. 11-24 is especially adapted for making eyelets or grommet holes, with or without metal rings, in sails, tents, tarpaulins, mail bags, wagon covers, canvas bags, or other articles of similar heavy material. Extra large work can easily be accommodated, there being a clear working space of 30 inches at the right of the needle.
Sample of Work Showing 3/4 inch Eyelets made on Machine No. 11-24
Metal Rings inserted at one operation

The machine is furnished with parts for changing the feeding mechanism to feed the work across the arm, so that straight seams can be made if desired.

A large output of work can be accomplished as the machine can be driven up to the speed of 650 stitches per minute.

The bight or width of stitch can be varied up to 3/4 inch and eyelets, 1/2, 5/8, 3/4 and 7/8 inch inside diameter can satisfactorily be made on the machine as regularly fitted, the eyelets being completed with or without metal rings as desired.

When ordered, the machine can be furnished with special fittings to make holes from 1 inch up to 4 1/2 inches in diameter, the variations in size being not less than 3/4 inch. If metal rings are to be covered, samples of the rings should accompany the order.

This machine is fitted with the Singer Driving Attachment, which will be found very convenient when making eyelets as the machine can be started or stopped instantly.

When ordered, column stand No. 14685 is furnished at an extra charge.
