MANUFACTURING

Automatic Tension
Sewing Machine

NEW POSITIVE FEED MACHINE

Type 500-A

7 to 22 Stitches Per Inch

When operated by power the normal
speed is 3000 perfect stitches per minute.

THIS machine with its Automatic Tension is largely used in the manufacturing lines where a single thread can be applied. It makes a firm, strong, dependable seam, yet quite elastic, so it will give easily with sheer material, or such as is more or less elastic. Absolute uniformity of stitch is assured.

It is built on the same lines as our Family Automatic with its record of nearly half a century of marked success. All its wearing parts, however, are made stronger to meet the more exacting requirements of manufacturing and high speed.

Gathering and Shirring can be done by the use of a "Long Stitch" and the Foot Gathering Attachment.

Manufacturers using this Automatic Tension Machine for making *neckties* pronounce it ideal.

It will be found equally satisfactory on all other classes of material where elasticity of seam is required.

Provision is made so that the machine may be used with or without a Foot Lift.

Our claims for this, as well as for all our other machines, are:

- Lowest Maintenance Cost
- Highest Sustained Speed
- Largest Production
- Perfect Stitches
- Least Vibration
- Quietness in Operation

An Investment—Not an Expense

WILLCOX & GIBBS

MANUFACTURING SEWING MACHINES

Chainstitch Machines—Various Types
Lockstitch Machine—High Speed
Straw Machine—Visible Stitch
Straw Machine—Invisible Stitch
Overlock Machines—Various Types
Flatlock Machine for making Flat Seams
Feldlock Machines for Lap Seam Felling, and
many other Machines for special lines of work.
