

CORNELY
LATEST IMPROVED MODEL
TWO NEEDLE, FOUR THREAD
CORDING MACHINE
 with **CHANGEABLE GEAR**
ATTACHMENT
 and
BRAIDING ATTACHMENT.
MACHINE "LTG"

Manufactured by
 Anciens Etablissements
 R. Cornely & Cie.,
 Paris, France

This machine is the latest progression and improvement of the Cornely Machine LT, having a built-in Changeable Gear Attachment by means of which the revolutions of the Cording Spool Carrier can be retarded in its action instantly to make one revolution to each One, Two, Three, Four, Five or Six stitches of the needle.

This machine produces all the special stitches of the Machine LT, such as two needle chain stitch with or without covering threads or fillers, which can be made in four different widths.

No separate attachments, such as Two to One, Four to One, or Diamond Stitch are necessary for this machine, as this work is produced by means of the built-in Changeable Gear Attachment.

A new separate extra three needle attachment can be obtained for this machine, which makes three rows of chain stitches close together, in one operation, using threads from three separate spools and chain stitches of three different colors can be made. When the three needle attachment has been put on this machine can be used as One, Two or Three Needle Machine.

Many new combination effects with variable spacing and with one, two or three needles may be produced. In addition, this machine produces all the different stitches of Machines A, B, K, L, LG and LT.
