

CORNELY
LOCK-STITCH
BRAIDING MACHINE
WORKING WITH
INVISIBLE STITCH.
MACHINE "FB"

Manufactured by
Anciens Etablissements
R. Cornely & Cie.,
Paris, France

This new braiding machine produces all kinds of braiding work, both flat and raised (stitched on edge) with a perfection which has never before been attained, surpassing in beauty and regularity even the highest class of braiding done by hand.

When soutache or other braids with sufficient body are employed, the flat braiding effect is produced with an absolutely invisible seam, like hand work—the stitches of the machine cannot be seen—and this also permits the use of President braid, which no machine has heretofore been able to work.

Such materials as tubular and line braids, satin piping, satin folds, satin tubing and round cords, both plain and fancy, can be used.

The machine being a Lockstitch Machine its stitch is absolutely fast and locked. The machine can also be used for making embroidery effects with the plain lock stitch.
