

UNIART EMBROIDERY MACHINE

An entirely new development in machines for imitating hand embroidery.

The distinctive feature of this machine is its stitch which can be made up to $\frac{3}{4}$ of an inch in width, and which duplicates the diagonal stitching found only in hand embroidery.

As the entire head of the machine oscillates, this makes possible the extremely wide stitches which are easily controlled by means of a knee presser.

The machine works on all kinds of materials from fine nets to heavy velvets and leather, and employs all kinds of threads such as cotton, natural and artificial silk, wool, worsted and metal threads.

The machine is extremely simple, capable of rapid production and its operation quickly learned by inexperienced help.
