55. COUSSAREA.

Coussarea, Aubl. Pl. Gui. i. p. 98, t. 38; Benth. et Hook. Gen. Plant. ii. p. 120.

About twenty species of shrubs and trees, principally Brazilian.

   **Costa Rica** (*Warscewicz*).—**Venezuela**.

2. **Coussarea**, sp.?

56. FARAMEA.

Shrubs or small trees, chiefly Brazilian. About forty species.

1. **Faramea odoratissimum**, DC. Prodr. iv. p. 496.
   *Coffea occidentalis*, Jacq. Stirp. Amer. t. 47.

2. **Faramea suaveolens**, Duchass. in Bonplandia, 1858, p. 8.
   **Panama** (*Duchassant*).

3. **Faramea**, sp.

Tribe XXI. PSYCHOTRIÆ.

Twenty-seven genera are referred to this tribe, which is generally dispersed in the tropics. Several of the genera, notably *Psychotria* itself, are very numerous in species, which are nearly all shrubby or arboreous.

57. PSYCHOTRIA.

A genus of upwards of 500 species, generally dispersed in the tropics, but having their greatest concentration in America. The American species are greatly in need of revision. We have departed from our practice of giving the unnamed species in Kew herbarium, because so few of the published names are therein represented by named specimens, though of the forty or so unnamed species, probably twenty are undescribed.
