

polyps mutilated, and spermatid cords and lamellae visible, enlarged; 13 *f*, visceral lamellae exsert from mouth.—p. 257.

Fig. 14. *ORBICELLA ORION*, worn surface of corallum, natural size; 14 *a*, same, enlarged; 14 *b*, vertical section, natural size.—p. 720.

Figs. 15, 15 *a*. *ASTREA FORCATA*? transverse and vertical sections, natural size.—p. 721.

PLATE 14.

Fig. 1. *MEANDRINA LABYRINTHICA*, outline of fossa and lamellae of corallum, natural size.—p. 256.

Fig. 2. *MEANDRINA CEREBRIFORMIS*, outline, *ibid.*—p. 263.

Fig. 3. *MEANDRINA TRENCATA*, outline, taken from worn corallum, showing form of fossa, and intervening solid septa, natural size; 3 *a*, general direction and width of fossae.—p. 264.

Fig. 4 *a*. *MEANDRINA STRIGOSA*, transverse section of corallum, natural size; 4 *b*, vertical section, *ibid.*—p. 257.

Fig. 5 *a*. *MEANDRINA RUSTICA*, transverse section of corallum, natural size; 5 *b*, vertical section, *ibid.*—p. 258.

Fig. 6. *MEANDRINA GRACILIS*, surface of corallum, natural size; 6 *a*, outline of fossae, and profile of lamellae, natural size; 6 *b*, transverse section of corallum, natural size.—p. 261.

Fig. 7. *MEANDRINA TENUIS*, part of expanded zoophyte, enlarged; 7 *a*, one of the tentacles, enlarged; 7 *b*, profile of lamellae and fossa, from a vertical section, natural size; 7 *c*, lamellae of same, enlarged; 7 *d*, transverse section of corallum, natural size.—p. 262.

Fig. 8. *MEANDRINA PHRYGIA*, surface of corallum, natural size; 8 *a*, profile of lamellae and fossa, from a vertical section, natural size; 8 *b*, vertical section of corallum, natural size.—p. 260.

Fig. 9. *MEANDRINA FILOGRANA*, profile of lamellae and fossa.—p. 262.

Fig. 10. *MEANDRINA MAMMOSA*, profile of lamellae and fossae; 10 *a*, general character of trenches and ridges.—p. 265.

Fig. 11 *a*. *MEANDRINA VALIDA*, worn surface of corallum, natural size; 11 *b*, profile of septa and fossae, of same.—p. 259.

Fig. 12 *a*, 12 *b*. *MEANDRINA DEDALEA*, profile views of lamellae and fossae, natural size; 12 *c*, vertical section of corallum, natural size.—p. 254.

Fig. 13. *CTENOPHYLLIA PECTINATA*, profile of lamellae and fossae, natural size.—p. 170.

Fig. 14. *CTENOPHYLLIA QUADRATA*, *ibid.*; 14 *a*, view, showing breadth of fossa and the character of the lamellae.—p. 171.

Fig. 15. *CTENOPHYLLIA PACHYPHYLLA*, *ibid.*—p. 172.

Fig. 16. *CTENOPHYLLIA PROFUNDA*, *ibid.*—p. 172.

Fig. 17 *a*. *MEANDRINA SPONGIOSA*, *ibid.*; 17 *b*, view of surface, showing breadth of fossae.—p. 253.

Fig. 18. *MEANDRINA INTERRUPTA*, transverse section of corallum.—p. 258.

PLATE 15.

Fig. 1. *MERULINA REGALIS*, outline view of part of a few foia of a zoophyte, natural size; 1 *a*, view of living zoophyte; 1 *b*, enlarged view, showing the tentacles and a mouth; 1 *c*, enlarged view of ridges and cells of corallum; 1 *d*, 1 *e*, enlarged profile views of lamellae.—p. 273.

Fig. 2. *MERULINA AMPLIATA*, enlarged view of ridges and cells of corallum; 2 *a*, enlarged profile of lamellae, and section of ridge.—p. 272.

PLATE 16.

Fig. 1. *MERULINA SPECIOSA*, corallum, natural size.—p. 273.

Fig. 2. *MERULINA SCABRICULA*, corallum, natural size, (part of

a clump); 2' a branch, showing surface and cells; 2 *a*, animals, enlarged; 2 *b*, section of corallum.—p. 275.

Fig. 3. *MERULINA LAXA*, branch of corallum, natural size.—p. 276.

Fig. 4. *PHYLLASTREA TURIFEX*, natural size; 4 *a*, polyp, enlarged; 4 *b*, surface of corallum, and cells.—p. 270.

PLATE 17.

Fig. 1. *MERULINA RIGIDA*, corallum in outline, natural size; 1 *bis*, branch of the same; 1 *a*, one of the prominences of the surface, enlarged; 1 *b*, animals, enlarged; 1 *c*, part of a transverse section of the corallum.—p. 276.

Fig. 2. *ECHINOPORA REFLEXA*, corallum, natural size; 2 *a*, animals of a portion, enlarged; 2 *b*, transverse section of corallum, enlarged.—p. 280.

Fig. 3. *ECHINOPORA ENDELATA*, corallum, natural size; 3 *a*, cell, natural size.—p. 278.

Fig. 4. *ECHINOPORA BORRIDA*, corallum, natural size; 4 *a*, polyps, enlarged; 4 *b*, transverse section of corallum, enlarged; 4 *c*, cell, enlarged.—p. 282.

PLATE 18.

Fig. 1. *FUNGIA TENUIS*, profile view of corallum, natural size.—p. 290.

Fig. 2. *FUNGIA GLANS*, *ibid.*—p. 290.

Fig. 3. *FUNGIA DISCUS*, profile view of corallum, natural size, showing outline of lamellae, and under surface; 3 *a*, one of the intermediate lamellae, with the tentacular tooth.—p. 291.

Fig. 4. *FUNGIA DENTIGERA*, profile view of corallum, natural size, showing outline of lamella, (with the tentacular tooth,) and under surface.—p. 301.

Fig. 5. *FUNGIA AGARICIFORMIS*, profile view, *ibid.*—p. 292.

Fig. 6. *FUNGIA AGARICIFORMIS*, *VAR. TENUIFOLIA*, *ibid.*—p. 292.

Fig. 7. *FUNGIA DENTATA*, *ibid.*—p. 293.

Fig. 8. Same as 9 *b*, another specimen.—p. 293.

Fig. 9. *FUNGIA ECHINATA*, zoophyte, expanded; 9 *a*, tentacle, enlarged, with summit of ridge; 9 *b*, profile view of lamella of corallum, and under surface.—p. 294.

PLATE 19.

Fig. 1. *FUNGIA REPANDA*, a double individual, expanded, natural size; 1 *a*, profile of section of corallum, showing outline of lamellae, and the spines below, natural size. Fig. 2. Outline of a specimen from the Feejees. Fig. 3. A large specimen from the Feejees.—p. 295.

Fig. 4. *FUNGIA INTEGRALIS*, sectional view of corallum, showing outline of lamellae, natural size.—p. 296.

Fig. 5. *FUNGIA CONFERTIFOLIA*, sectional view, *ibid.*—p. 297.

Fig. 6. *FUNGIA CONFERTIFOLIA* (?), part of animal, expanded, natural size.—p. 298.

Fig. 7. *FUNGIA BORRIDA*, sectional view, showing outline of lamellae, natural size.—p. 298.

Fig. 8. *FUNGIA PAUMOTENSIS*, animal expanded, natural size; 8 *a*, sectional view of corallum, showing outline of lamellae, natural size. Fig. 9. Young? of this species.—p. 300.

Fig. 10. *FUNGIA SCUTARIA*, sectional view of corallum, showing outline of lamellae, natural size; 10 *a*, form, seen in vertical view.—p. 301.

Fig. 11. *FUNGIA EHRENBERRGHII*, sectional view, *ib.*, natural size.—p. 303.
