extensive is this survey of the Libraries’ holdings, that the exhibition will be divided into a rotation of three different displays over a period of 18 months. Among the show’s highlights are rare books published before the invention of the printing press, works by adventurous explorers like South Pole navigator James Cook and pilot Charles Lindbergh, scientific pioneers such as Galileo Galilei and Isaac Newton, and artists such as Albrecht Dürer and Walter Crane. Pop-up and

After a successful debut in New York City, Odyssey comes home to Washington, D.C.

At the May 15 Odyssey in Print opening reception, Smithsonian Secretary Lawrence Small spoke about the genesis of the Institution and the contributions the Libraries has consistently made to the Institution’s growth and continued development.

continued on page 4
In March, Rhoda Ratner retired from SIL after nearly 25 years of service. Known Smithsonian-wide for her adventurous sojourns to unusual locations, her keen fashion sense, and her passion for trade literature, Rhoda was an inspirational and enriching figure in the SIL community. She began her SIL career as the librarian in the Museum Reference Center and later moved to the American History Library, where she became Head of the History and Culture Department. Most recently, she served as SIL’s Interim Assistant Director for Research Services.

While at American History, Rhoda developed vital connections with curatorial staff and worked to make the library a hub of scholarly activity within the museum. Meanwhile, she pursued her greatest love, SIL’s superb trade literature collection. Thanks to Rhoda’s avid collecting, the collection, which currently numbers over 300,000 catalogs from over 30,000 companies, along with a wealth of other related ephemera, is America’s largest.

Highly respected for her pragmatism and organizational acumen, Rhoda will be deeply missed by both SIL and by those who have worked with her so closely over the last quarter century.

At a party held in her honor, Rhoda Ratner felt the gratitude of friends and colleagues with whom she worked during her nearly 25 years at SIL. Above, Director Nancy E. Gwinn presents Rhoda with one of many mementos.

‘Galaxy of Knowledge,’ a Digital Portal to the Collections

Ranging from art to zoos, SIL collections mirror the variety and depth of the Institution’s museum and research centers. Likewise, SIL’s digitization efforts range over a diverse body of materials. With its new Website, ‘Galaxy of Knowledge,’ SIL can now present its collection in a format and context that aids teaching, research and exploration.

SIL’s Digital Editions collection features an ever-growing assortment of rare volumes from the Dibner Library of the History of Science and Technology and SIL’s natural history collections. To date these include nine titles, notably: Tycho Brahe’s *Astronomiae instauratæ mechanica* (1602), which focuses on astronomy; Jacques Dauphinois Besson’s *Theatrum instrumentorum et machinarum* (1578), which features engineering; and Joachim Johann Nepomuk Spalowsky’s *Prodromus in Systema Historicum Testaceorum* (1795 [1801 issue]), an important work on mollusks, of which only a dozen copies are known. Though the primary audience for these editions is scientific researchers, the lavish illustrations offer a wide variety of cross-disciplinary uses.

Forthcoming digital editions include additional rare titles in natural history, over 900 portraits of scientists and inventors, selections from the Smithsonian’s Bureau of American Ethnology series, nearly 1,000 items from Smithsonian trade literature collections relating to...

continued on page 7

The Technology Behind Digital Editions

Just how do rare books get from the shelf to the Internet? The process starts in an erstwhile factory building in Northeast Washington, which is home to the SIL Imaging Center. Using an adjustable book stand, so that fragile volumes can be opened at angles that pose no danger to their bindings, David Holbert and Imaging Center technicians use a Hasselblad 35mm medium format camera with an 80mm or 150 mm lens to take images of at least 400 dpi. Each super-TIFF image is then sent to a Power Macintosh G3, where it is burned onto CD. One volume alone may necessitate the use of 100 or more CDs, which can each hold only four or five pages, depending on the size of the files. Martin Kalfatovic, Digital Projects Librarian and Head of the New Media Office, oversees the workings of the Imaging Center from his office on the Mall and regularly harvests this ‘raw material,’ the high resolution scans, which his office will turn into the digital editions available online. Web designer Nicole Van Doren creates a visually appealing framework for navigating each book. It is a lengthy and costly procedure. One page can take several minutes to process, and SIL relies heavily on gifts and grants to subsidize the digitization of each volume or series. However, such offerings are crucial to making vital research materials available on an international level, one of SIL’s principal goals.

The new SIL Web site, ‘Galaxy of Knowledge’
Letter from the Director

continued from page 1

gotten the move from wondering “how can we do this?” to the realization that the digital world has become a routine aspect of our collections and services.

With the initial learning curve behind us, SIL is leading in several partnership projects with Smithsonian museums. With the assistance of curators in the National Museum of American History, SIL is mounting portions of our fascinating trade literature collection on the Internet. Sewing machines and scientific instruments are the first two categories, but there will be more to come. With the National Museum of Natural History, SIL has embarked on preparing a digital edition of a 63-volume set called the Biologia Centra- Americana, the seminal work on the flora and fauna of Central America. These projects will create entirely new audiences for works that are fragile and unavailable to most of the population. What an exciting business to be in!

On my desk is a saying: “Nothing in the world can take the place of persistence.” Our experience in the digital world proves the truth of these words.

Meet the Libraries Board

Margery F. Masinter

Margery F. Masinter of White Plains, New York holds a Master’s Degree in the History of Decorative Arts from the Cooper-Hewitt, National Design Museum/Parsons School of Design and is an active volunteer in both the Cooper-Hewitt Library and the Museum’s Drawings and Prints Department. She is a former trustee and past president of the Neuberger Museum of Art and a former trustee of the Westchester Arts Council, the Lyman Allyn Art Museum at Connecticut College, Grand Street Settlement in New York City, and Snake River Institute in Wilson, Wyoming. She was also a Public Relations Manager with Neiman-Marcus and a founder/producer of the Playmakers Theater for Children. Her husband, Edgar M. Masinter is a retired partner of Simpson, Thatcher and Bartlett in New York City and is currently a Managing Director at J. P. Morgan, Chase & Co. He joined the Smithsonian National Board in 2001. The Masinters have been among the Libraries Board’s most generous donors to date. A member of the Libraries’ Campaign Steering Committee, Margery has recently completed a three-year pledge to support activities of the Cooper-Hewitt Library. In response to the launch of the Libraries’ Partners in Discovery campaign, the Masinters have recently made a commitment to

Frank J. Quirk

Frank J. Quirk of Alexandria, Virginia is Chairman of the Board and Chief Executive Officer of Macro International Inc., a business, research and technology consulting company he helped to found. He has been CEO since 1980. Since 1999, he has also been Executive Vice President and Director of Opinion Research Corporation, and he is a past Director of Ameribank (1992-1995). He received undergraduate and Masters of Business Administration degrees from Cornell University and is serving his third term on the Cornell University Council (1999-2003). Frank is also on the Board of Directors of the Professional Services Council, a trade association in the Washington metropolitan area representing over 130 professional and technical services firms. He and his wife Betty are very interested in the Smithsonian Institution and have recently established The Frank J. and Betty M. Quirk Endowment at the Libraries, income from which will be used to support technology activities, programs, and equipment to further the goals of the Libraries’ New Media Office.

Frank is an active member of the Libraries’ Campaign Steering Committee.
Harkening back to the beginning of the 20th century, the 3rd annual Spencer Baird Society Benefactors Dinner on April 22, 2002, featured a highly entertaining presentation on Theodore and Edith Roosevelt’s Washington by Edmund Morris and Sylvia Jukes Morris at the National Museum of American History, Behring Center. Baird Society members and guests of the Museum were welcomed first with a reception held at the exhibition The American Presidency, A Glorious Burden. After the reception, guests were escorted back in time to a gold-washed setting in the Museum’s Flag Hall, at the entrance to the Roosevelt-era façade of the White House opening into the Hall of First Ladies.

After consuming wild mushroom salad, herb encrusted sea bass and asparagus, and bittersweet chocolate pecan bourbon cake with homemade vanilla ice cream, Benefactors and guests were treated to a rare dual talk by the Morrises, both renowned biographers, he of Theodore Roosevelt and she of Edith Kermit Roosevelt, among others. Seamlessly moving back and forth between them, the Morrises painted a lively picture of life in Washington during the Roosevelts’ tenure in the White House. Complete with excerpts from their correspondence and the liberal use of period accents and even snatches of song, the presentation highlighted an era when all seemed possible.

The Morrises were introduced by Nancy Gwinn, Director of the Libraries, and Marc Pachter, Acting Director of the National Museum of American History, Behring Center. Both directors noted the synergy between the Smithsonian Libraries and the Institution’s museums with respect to both research and exhibition/public outreach. The Spencer Baird Society enables the Libraries to advance its ability to care for and enhance the nation’s collections in support of the Smithsonian’s mission.

- Gwen Leighty

Margery Masinter

establish the Margery F. and Edgar M. Masinter Endowment for Illustrated Books, a fund that will enable the Libraries to acquire and preserve illustrated works in all subject areas of the Libraries’ holdings. Libraries Director Nancy E. Gwinn called this pledge “an inspired and generous gift, showing clearly that Margery and Edgar Masinter understand the nature of our museum library collections and our need to continually enhance and protect our books for the use of future generations.”

Members of the Smithsonian Libraries Board have made gifts and pledges in recent months totaling $500,000 in support of the Libraries’ $20 million capital campaign, ‘Partners in Discovery.’ Board Chair Rosemary Livingston Ripley has pledged to support the S. Dillon Ripley Library Endowment, an acquisitions endowment established in honor of her father’s 80th birthday in 1993. Vice Chair Brian J. Heidtke and his wife, Darlene, have made a pledge over five years to support the Libraries’ book preservation program. Frank J. Quirk and his wife Betty have made a pledge to increase their technology endowment, established in 2000. Margery F. Masinter and her husband Edgar have made a five-year pledge to establish the Margery F. and Edgar M. Masinter Endowment for Illustrated Books, a fund that will enable the Libraries to acquire and preserve illustrated works in all subject areas of the Libraries’ holdings. Libraries Director Nancy E. Gwinn called this pledge “an inspired and generous gift, showing clearly that Margery and Edgar Masinter understand the nature of our museum library collections and our need to continually enhance and protect our books for the use of future generations.”

For information on supporting the Partners in Discovery campaign, please contact Gwen Leighty, Development Officer, at 202-786-2875 or via email at leightyg@si.edu.
New and Award-Winning Staff Publications

**Odyssey in Print, a companion to the exhibition**

An Odyssey in Print

Odyssey has garnered a number of prestigious awards since its release in May 2002.

In May 2002, to coincide with the opening of the exhibition *An Odyssey in Print*, SIL published an accompanying book. It features a history of SIL, written by exhibition curator and Assistant Director for Reader Services and Strategic Planning, Mary Augusta Thomas, as well as essays by Michael Dirda of Washington Post Book World and Storrs Olson of the National Museum of Natural History. A foreword by Director Nancy E. Gwinn launches the journey through the SIL collection.

*Odyssey* won top honors at the 2002 Washington Book Publishers Design Competition. Of 37 award categories, *Odyssey* received two ‘First Place’ awards, one for its interior design and another for cover design. *Odyssey* also took home the competition’s ‘Best of Show’ award. In early June, the book won an Honorable Mention in AAM’s Publications Design Competition.

To purchase a copy of *Odyssey*, please contact Smithsonian Institution Press at (800) 782-4612 or visit the Web site at: www.sipress.si.edu

**Wonder Bound relates a fascinating museological history**

The new exhibition, *Wonder Bound: Rare Books on Early Museums*, a collaboration between the National Museum of Natural History and the Smithsonian Institution Libraries, relates the fascinating and complex story that lies behind the development of natural history museums.

 Curated by Leslie Overstreet, Curator of Natural History Rare Books, *Wonder Bound* includes illustrations of Renaissance-era “cabinets of curiosities,” also known as “Wunderkammern,” and features 18th and 19th century publications containing specific instructions for collecting and documenting specimens. Such pamphlets were given to adventurers, merchants, and sailors in hopes of their returning with new specimens and materials for museum collections. The historical survey continues into the present day, with illustrations of curators from the National Museum of Natural History engaged in similar activities.

from the special collections department

Dibner Library Resident Scholars

Guido Giglioni is a Ph.D. candidate in the Department of the History of Science, Medicine, and Technology at The Johns Hopkins University, where he is writing a dissertation on the work and life of the English anatomist, physician, and philosopher, Francis Glisson (1598-1677). At the Dibner Library, Guido’s research project titled, “Motion, Life, and Perception in Early Seventeenth-Century England,” concentrates on the authors Francis Bacon, William Gilbert, and William Harvey. These three figures espoused theories of vital naturalism that influenced Glisson and his theory of life, which was based on the belief that there are perceptive powers inherent in matter.

Jen E. Boyle, a Ph.D. candidate in the Department of English and Comparative Literature at the University of California, Irvine, is currently working on a dissertation titled, “Anamorphic Imagination and the Empirical Body: Perspective and the Embodiment of Space and Text in Restoration and Early Eighteenth-Century Science.” At the Dibner Library, Boyle studied 18th-century perspective manuals and the exchange of mathematical theories and the technologies of perspective between England and France.

Amy Ackerberg-Hastings obtained her Ph.D. in the history of technology and science from Iowa State University in 2000. Her project at the Dibner Library is an expansion of her doctoral dissertation and is titled, “American Geometry Teaching, 1750-1850.” It explores the American approach to geometry instruction and its indebtedness to European methodology and thought. Her work examines the use of Euclid’s Elements as a standard didactic text, how American text-book authors have traditionally followed European developments in geometry teaching, and whether advances made abroad should serve as models for American education.

Parting Shots

Author Mary Augusta Thomas of SIL and contributing essayist, Washington Post Book World critic Michael Dirda recently completed a whirlwind tour of publicity engagements related to the release of Odyssey in Print, the book. Below, Mary Augusta and Michael are seen resting their hands at a recent signing event held for the Institution’s contributing members.

Parting Shots will be a regular feature of Information and will provide a glimpse of the world in and around SIL.
